Understand your lighting **PARwise PRO**

Because Light Is Food

Perfect growth rates need three things: The correct wavelengths, the correct intensity of light and both of these for the correct amount of time. Light changes with depth and clarity so too does the requirements of plants and animals. - PARwise PRO does it all and more!

PARwise PRO takes light measurements to new level with an expanded spectral range and introduces cPUR - The new gold standard in coral lighting measurements.

Measures:

PARwise

Because Light Is Food

Perfect growth rates need three things: The correct wavelengths, the correct intensity of light and both of these for the correct amount of time. Light changes with depth and clarity so too does the requirements of plants and animals.

Unfortunately, the human eye is not particularly good at understanding light levels and colours! PARwise provides you with a simple to use light meter which will give you a deep understanding of your lighting and how to tune it to perfection.

D.L.I.
Daily Light Intergration
The amount of light in 24hours plotted on an easy to read graph

Perfekte Wachstumsraten erfordern drei Dinge: Die richtige Wellenlänge, die richtige Lichtintensität und beides jeweils zur richtigen Zeit. Das Licht ändert sich mit der Tiefe und der Klarheit und das gilt auch für die Bedürfnisse unserer Pflanzen und Tiere.

Leider ist das menschliche Auge nicht gut darin, Lichtstärken und Farben zu verstehen! PARwise bietet Ihnen ein einfach zu bedienendes Lichtmessgerät, das Ihnen ein tiefes Verständnis für Ihre Beleuchtung vermittelt und Ihnen zeigt, wie Sie diese perfekt abstimmen können.

Entwickelt und hergestellt im Vereinigten Königreich

Perfekte groeiselheden vereisen drie dingen: De juiste golflengte, de juiste intensiteit van het licht en beide binnen de juiste hoeveelheid tijd.

Licht verandert met diepte en helderheid, net als de behoeften van onze planten en dieren. Helaas is het menselijk oog niet goed in het begrijpen van licht-niveaus en kleuren! PARwise biedt u een eenvoudig te gebruiken lichtmeter die u een diep inzicht geeft in uw verlichting en hoe u die tot in de perfectie kunt afstellen.

Grow Amazing Coral M-Rack

The Modular Rack System

M-Rack is an all new approach to mounting accessories to your aquarium.

It gives you the flexibility to change out your accessories as you need whilst allowing you to save money by re-using the magnets.

Get just one magnet and have access to an ever-growing range of useful accessories and racks! Each piece sold individually.

Utilising premium quality materials, either side of the magnet can be used in or out of the tank maximising what you can do.

M Rack grows with your hobby allowing you to adapt over time without the cost and environmental damage of outdated or unsuitably sized accessories.

Endless possibilities for the coral grower.
